Office Action Summary

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16-24, drawn to a method of making a crate, classified in class 29, subclass 428.
- II. Claims 1-15, drawn to a crate, classified in class 206, subclass 509.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by a different process wherein the inner surface of the side wall is not formed by a contouring step in which the side wall is reduced but is formed in a molding process with no reduction.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. James Kallis on December 3, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the
